The Project *from Hell*

*A one day workshop experience
with **Peter Taylor**
The Lazy Project Manager*

Compete with
your colleagues
in bringing this project
back from the brink of complete failure
to the realms of success – *from Hell to Heaven.*

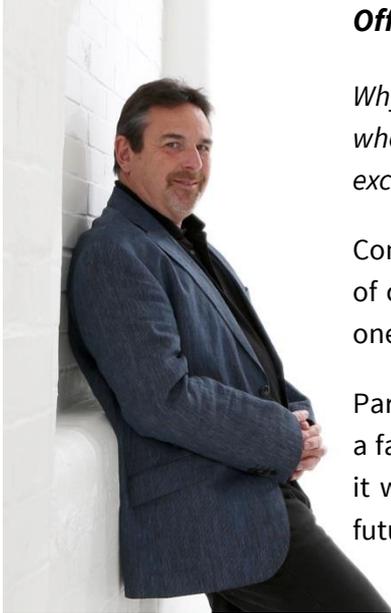

Peter Taylor is a PMO expert who has built and led four global PMOs across several industries, and has advised many other organizations in PMO and PM strategy.

In the last 5 years, he has delivered over 250 lectures around the world in over 25 countries and has been described as '**perhaps the most entertaining and inspiring speaker in the project management world today**'.

He is also the author of the number **1 bestselling project management book 'The Lazy Project Manager'** www.thelazyprojectmanager.com along with many other books on project leadership, PMO development, project marketing, project challenges and executive sponsorship.

His mission is to teach as many people as possible that it is achievable to 'work smarter and not harder' and to still gain success in the battle of the work/life balance.

The Project from Hell

Off to the time machine to save the worst project in history...

Why learn about Project Success and Failure in a dry, traditional manner when instead, you could participate in rescuing the Project from Hell in this exciting, interactive and fun workshop?

Compete with your colleagues in bringing this project back from the brink of complete failure and in to the realms of success – to hell and back in one workshop!

Participants are divided into a number of teams whose role it is to analyse a failed project case study and then present back, what went wrong, why it went wrong, and their recommendations for improvements to ensure future success.

With all events encountered being based on a real case study, the Project from Hell has relevance across any business sector and is very appropriate for mixed project skills within teams. To quote one participant: *'I'm sure this project from hell is based on Project X that we stopped last year'*.

Who should attend?

The aim is a challenging but enjoyable environment with lessons learnt staying in the mind because of the practical and experiential nature of the learning environment. Therefore, the audience is 'everyone' connected in any way to project based activity.

The workshop is ideal for re-energising your project management enthusiasm, learning ways to start better projects (as well as ways to recover those that have gone a little off course), is a perfect experience for a new project/program team, and can even be used to evaluate would-be project manager candidates.

Learning Outcomes

Participants will derive real value from the Project from Hell workshop content and materials, as they very much reflect everyday real-life scenarios; what can go wrong, mistakes that can be made, loss of control that can be experienced etc. Delegates have to identify these and work out ways in which such events can be more successfully managed in the future, guided by the experience of the workshop leader everyone will walk away with something useful and something they can apply to their day job immediately.

The amount of time available is tightly controlled to generate the stresses and strains of real world projects and team working. Quickly this is no longer a case study but a living breathing project that must be saved, by a deadline that is rapidly approaching and cannot be missed.

Welcome to your real project world!

Agenda

Topic
The Journey of Expectation Management The key to project management success is an open mind in the early stages of the project and real stakeholder engagement in the 'alignment' process
What makes a project from 'Hell'? Team exercise to understand common issues with difficult and challenging projects
